SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection.

The National Marine Fisheries Service (NMFS) proposes to collect socio-economic data about small scale fishermen and seafood dealers operating in the U.S. Caribbean. The survey intends to collect information on demographics, fishing practices, costs and earnings (revenues, variable and fixed costs), market and distribution channels, capital investment, attitudes and perceptions about the performance management actions and the health of local fisheries, including the impact of invasive species. The data gathered will be used to describe U.S. Caribbean fisheries, assess socio-economic performance of small-scale fleets, and evaluate the socio-economic impacts of federal regulatory actions. In addition, the information will be used to strengthen and improve fishery management decision-making, satisfy legal mandates under Executive Order 12866, the Magnuson-Stevens Fishery Conservation and Management Act (U.S.C. 1801 et seq.), the Regulatory Flexibility Act, the Endangered Species Act, and the National Environmental Policy Act, and other pertinent statutes.

II. Method of Collection

The socio-economic information sought will be collected via in-person, telephone and mail surveys.
